

An aerial photograph of a coastal city, likely Hong Kong, showing a dense urban area built on a peninsula and surrounding hills, with a large body of water in the foreground. The sky is overcast.

DB Schenker in China

Schenker China Ltd. | Ningbo | June 2018

DB Schenker History

1872

Gottfried Schenker founds Schenker & Co. in Vienna, Austria. Only one year later, he implemented his idea of rail system freight – a brilliant idea!

1895

Foundation of Austro-American Shipping Company – only one of the milestones in terms of company growth.

1922

First air freight shipments in Germany – Schenker starts to consistently leverage the company's logistics portfolio.

1931

First ocean freight container shipments – additional transport modes enable Schenker to think outside the box and offer multiple logistics solutions.

1972

Official supplier to the IOC for freight forwarding and customs clearing for the Olympic Games between 1972 and 2016 – big events rely on the Schenker expertise.

2010

DB Schenker expands in energy and resource markets and wins the 350 m€ GORGON integrated logistics services contract.

2016

In recent years, DB Schenker Logistics has further expanded its network through acquisitions and investments in various areas.

By challenging the status quo in the logistics industry, we strive toward economic, social, and environmental harmony in logistics and supply chain management.

The Impact of Block Chain on Logistics Industry

Schenker China Ltd. | Ningbo | June 2018

An aerial photograph of a wide fjord with steep, forested mountains in the background. A large cargo ship is visible in the middle of the water, leaving a white wake. The image is overlaid with three horizontal semi-transparent grey bars containing text.

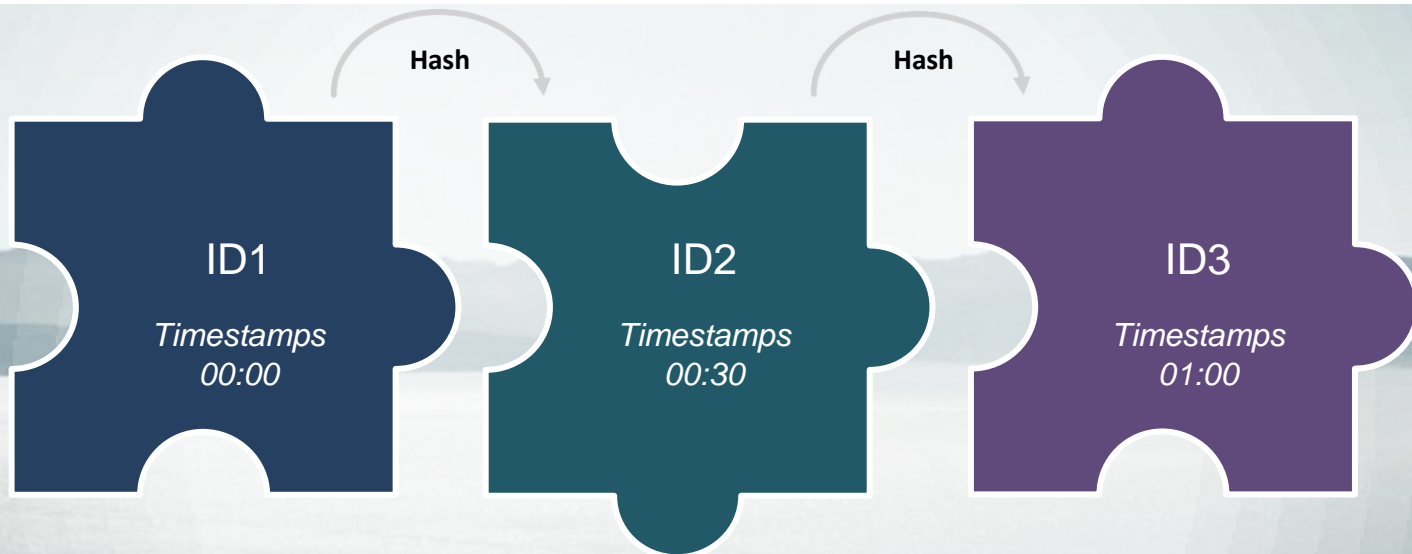

Ownership Determination of Data

A dark blue circle with a white border, partially overlapping the left side of the slide.

Block Chain

Measurement

Transfer of Value

- Block chain is a decentralized database, based on modern cryptography, distributed consistency protocol, peer to peer network communication technology.
- Each block consists of block head and block body, head records version number, the previous block address, the timestamp, the random number etc., body records what we want to record.

Application in logistics – Luxury

Application in logistics – Wine
